**研究领域**

My research area is about AdS/CFT correspondence, gauge-gravity duality based on string theory and “top-down” holographic model. Recently, I am interested in the topics about the holographic fermion in D-brane system, quantum chaos, out-of-time-order correlators (OTOC) in gauge-gravity duality and in quantum field theory.

**Key words:** AdS/CFT; gauge-gravity duality; string theory; holographic QCD; OTOC; quantum chaos

我的研究领域是关于AdS/CFT对应、弦理论中的规范引力对偶以及“从上到下”的全息模型。最近，我沉迷于研究D膜系统中的全息费米子、量子混沌性、规范引力对偶及量子场论中的非时序关联函数等相关问题。

**关键字：**AdS/CFT；规范引力对偶；弦理论；全息量子色动力学；非时序关联函数；量子混沌性
